INVITED SPEAKER PRESENTATION GUIDELINES

A goal of this Congress is to engage all attendees in meaningful dialogue. In order for this model to succeed, it is vitally important that all presenters stay on time and leave time for audience questions as outlined. Presenters should rehearse their presentations in advance to make sure they are under the allotment of time. It is mandatory that you keep to your scheduled time, and the session Chairs will ask you to stop once you have reached your official time allocation.

As there can sometimes be revisions to the program, upon receiving the Congress Guide while onsite at the congress, please ensure you confirm your session room assignment, date and time.

NEW for the World Congress of Dermatology for 2015:
All Presentations should be set in 16:9 HD wide-screen format (High-Definition)

AUDIO VISUAL SUPPORT

An Audio Visual Technician (AV Tech) will visit all session rooms at the beginning of each session to ensure the equipment and presentations are loaded and ready to go. For the Invited Plenary Sessions, a designated AV Tech will be in the Plenary room. Each room will be equipped with an LCD projector, computer, laser pointer and microphone.

Presentations will have been loaded on to the session room computer in advance of the session start. Speakers will select their presentation from the computer at the podium to begin the presentation. Presenters must include a Conflict of Interest Disclosure Slide as their first slide.

Speaker Timing Device

All sessions will have a Speaker Timing Device to be set by the Chairs/Co-Chairs of the session. We strongly recommend that your final slide contain your key points/messages/conclusions in case you run out of time and you need to advance your presentation to the final slide, in order to keep the presentation on time.

Presenters should rehearse their presentations in advance to make sure they are under the allotted time and leave sufficient time for questions.
